

400 Series

Take the Guesswork out of Filter Maintenance

A fuel restriction indicator with a locking feature is now standard for every aftermarket (non-OEM) 445R, 460R, 490R, 4120R, and 4125R Series Fuel Filter/Water Separator beginning in January 2009.

The fuel restriction indicator simply replaces the standard air vent plug. The indicator installs directly into the vent port on the filter head and includes an O-ring seal.

Racor fuel restriction indicators allow operators to monitor filter condition at a glance. As restriction increases, the yellow indicator moves down towards the red "service" area. The yellow indicator will keep its position until the reset button is pressed, even after the engine is shut down. No more guesswork, simply change the filter before the indicator reaches the red zone and avoid costly roadside downtime.

Features and Benefits:

- Onboard diagnostic tool
- Maximizes fuel filter life
- Easy to install
- Takes the guesswork out of fuel filter maintenance
- Rugged and reliable
- Lowers operational costs
- Use with diesel, ethanol, and biodiesel fuels
- Shows restriction up to 10 inHg

| Specifications | RK 32036 |
|------------------------------|---------------------------------|
| Accuracy | ± 10% |
| Calibrations | 10 inHg (34 kPa) at red zone |
| Material | Chemical Resistant Nylon |
| Length | 2.5 in. (6.4 cm) |
| Diameter | 1.3 in. (3.3 cm) |
| Port Thread | 3/8" SAE |
| Operating Temperature | -40° to +250°F (-40° to +121°C) |
