

31871 Twin Pack

Replacement Filter For Mercury Engines

Product Information:

Parker filtration divisions (globally) provide a comprehensive range of filtration solutions for any application. These filtration solutions include: hydraulic, engine fuel, oil, air, crankcase, coolant, emission and monitoring systems.

This filter fits Mercury outboard engines, namely Optimax® and Verado®, which utilize a patented Racor supplied fuel filtration system.

You should always carry extra replacement elements as one tankful of dirty fuel can plug a filter. The 31871 solves this problem by providing two filters in every pack.

*Optimax and Verado are trademarks of the Brunswick Corporation.
